CREATIVE TEACHING STRATEGIES

GAYATHRI

(Department of Maths)

As a teacher, I have always believed that learning becomes truly meaningful when students are actively engaged. Using creative teaching strategies in the classroom allows me to connect with students in ways that make lessons both enjoyable and memorable. From hands-on activities and storytelling to role-plays, group projects, and the integration of technology, these methods help students understand concepts deeply while encouraging curiosity and critical thinking. Creative approaches also nurture collaboration, problem-solving, and confidence, making the classroom a space where learning is not just a routine, but an exciting journey.
